BASICS OF NETWORKING REVISIEW QUESTIONS

Q1. Define a **computer network**. **/2 marks**

Q2. State **three benefits of using computer networks** in organizations. **/3 marks**

Q3. Identify **three applications of computer networks** in modern organizations. **/3 marks**

Q4. List **four types of network classifications based on geographical coverage**. **/4 marks**

Q5. A company is planning to install a computer network.
List **four advantages of computer networks** in organizations. /4 marks

Q6. State **three disadvantages or limitations of computer networks**. **/3 marks**

Q7. List **four common network technologies used in modern networking environments**. **/4 marks**

Q8. State the purpose of the following **network topology types**: **/3 marks**

- Bus topology
- Star topology
- Ring topology

Q9. Identify **three main network components required when setting up a computer network**. **/3 marks**

Q10. Write the **function of the following networking devices**: **/3 marks**

- Router
- Switch
- Network Interface Card (NIC)

Q11. Identify **three materials used when installing network cables**. **/3 marks**

Q12. List **three tools used for terminating network cables**. **/3 marks**

Q13. State **three types of network cables used in computer networking**. **/3 marks**

Q14. Identify **two types of network cable installation methods** used in buildings. **/2 marks**

Q15. State **two common materials used for network cable trunking**. **/2 marks**

Q16. Identify **two versions of Internet Protocol (IP)**. **/2 marks**

Q17. State **two classifications of IP addresses** used in networking. **/2 marks**

Q18. Write the **subnet mask commonly used for Class C IP addresses**. **/1 mark**

Q19. Convert the **binary number 1010** into decimal. **/1 mark**

Q20. Convert the **decimal number 12 into binary**. **/1 mark**

Q21. ABC Company is planning to connect computers in its offices using a local network so that employees can share resources such as printers and files.

a) Define a **Local Area Network (LAN)**. **/2 marks**

b) Explain **three benefits the company will gain by implementing a computer network**. **/3 marks**

c) Identify **three network components required to set up the LAN**. **/3 marks**

d) Explain **two applications of computer networks in organizations**. **/2 marks**

Q22. XYZ Training Center is designing a network infrastructure for its computer laboratory containing 30 computers.

a) Explain the meaning of **network topology**. **/2 marks**

b) Describe **three types of network topologies used in computer networks**. **/3 marks**

c) Identify **two advantages of star topology** for the training center network. **/3 marks**

d) State **two disadvantages of bus topology**. **/2 marks**

Q23. **TechNet Solutions** is preparing to install network cables in a new office building.

a) Identify **three tools used when terminating network cables**. **/3 marks**

b) List **three materials required for network cable installation**. **/3 marks**

c) Explain **two types of network cable installation methods used in buildings**. **/2 marks**

d) State **two trunking materials used to protect network cables**. **/2 marks**

Q24. **SmartLab School** wants to configure IP addresses for computers in a laboratory network.

a) Define **IP address**. **/2 marks**

b) Identify **three classes of IPv4 addresses**. **/3 marks**

c) Explain the purpose of a **subnet mask in networking**. **/3 marks**

d) Assign an example **Class C IP address and subnet mask** suitable for the school network. **/2 marks**

Q25. MediaTech Company is configuring networking devices for its internal network.

a) Identify **three basic networking devices used in network infrastructure**. **/3 marks**

b) Explain the function of each of the following devices: **/3 marks**

- Router
- Switch
- Access Point

c) Explain **two advantages of using switches instead of hubs in modern networks**. **/2 marks**

d) State **two tasks performed during configuration of basic network devices**. **/2 marks**

Q26. ABC Training Institute is installing a computer network for its new laboratory containing 25 computers.

a) Identify **four network components required to build the network**. **/4 marks**

b) Describe the **steps involved in terminating a UTP network cable using an RJ-45 connector**. **/4 marks**

c) Explain **two types of network cable installation methods used in buildings**. **/3 marks**

d) Describe **two trunking materials used to protect network cables**. /**2 marks**

e) State **two safety precautions when installing network cables**. **/2 marks**

Q27. **TechNet Organization** wants to configure IP addressing for computers in its internal network.

a) Define **IPv4 address**. **/2 marks**

b) Identify **three classes of IPv4 addresses and their default subnet masks**. **/4 marks**

c) Convert the following **binary numbers to decimal**: **/3 marks**

- 1100
- 1011

d) Explain the concept of **subnetting in computer networks**. **/3 marks**

e) State **two types of subnetting used in networking**. **/3 marks**

Q28. **Bright Future School** is installing and configuring networking devices in its computer laboratory.

a) Identify **three networking devices required to connect computers in a LAN**. **/3 marks**

b) Explain the function of each device**. /3 marks**

c) Assign IP addresses to **three computers in the network using Class C addressing**. /3 marks

d) Configure the network interface of a computer with the following details:

IP address: 192.168.1.10 **/3 marks**

Subnet mask: 255.255.255.0

Gateway: 192.168.1.1

e) Test connectivity between computers using appropriate networking commands. **/3 marks**
