DECISION

| EXAM DETAILS | | TRAINEE'S DETAILS | |
|---|---|---|---|
| **Sector** | ICT & MULTIMEDIA | **Trainee's name** | …… |
| **Trade** | NETWORKING | **Trainer's name** | NIZEYIMANA Eraste |
| **Module code** | NEWTF301 | **Module title** | NETWOTK FUNDAMENTALS |
| **Level** | 3 | **Date** | 10:30AM - 12:00PM<br>MONDAY 03 NOVEMBER 2025 |

**Instructions**

*1. This question paper contains only ONE section. Answer all questions.*
*2. You have 1 hour 30' to complete the examination*
*3. Do not write anything on this question paper*

## Learning Outcome 1: Identify Network Concepts

- **Indicative contents**

1.1 Description of network concepts and technologies
1.2 Description of Network topology
1.3 Description of Network components
1.4 Classification of network devices
1.5 Description of network models

……

**Question1:** Explain what a computer network is and give one real-life example of its use. **/2marks**

**Question2:** What is a network device used to connect multiple computers within the same network? **/2marks**

**Question3: Multiple Choice Question /2marks**

Which of the following is used to connect networks over long distances?
A. Switch
B. Router
C. Printer
D. Monitor

**Question4:** A company wants to allow all employees to access the same shared files. What type of network would best support this?
A: Local Area Network (LAN) to allow internal sharing of resources. **/2marks**

**Question5:** If a user wants to access the internet wirelessly in a café, which network technology is being used? **/2marks**

**Question6:** Which network type connects devices across cities and countries? **/2marks**

**Question7:** What is meant by "network technology"? Give one example. **/2marks**

**Question8:** What network technology allows devices to communicate within short distances, such as connecting a phone to a speaker? **/2marks**

**Question9:** True or False **/2marks**

Fiber optic technology uses light signals to transmit data at high speed.

**Question10:** A student wants to transfer files quickly between two laptops without internet. Which technology can be used, and how? **/2marks**

**Question11:** Your computer automatically receives an IP address when connected to Wi-Fi. Which protocol is responsible for this? **/2marks**

**Question12:** What protocol is used to translate domain names into IP addresses? **/2marks**

**Question13:** Explain a major disadvantage of bus topology. **/2marks**

**Question14:** Define network topology in your own words. **/2marks**

**Question15:** Which topology has a single central device connecting all computers? **/2marks**

**Question16:** Draw a simple star topology diagram**. /2marks**

**Question17:** Failure of the central device causes total failure in which topology? **/2marks**

**Question18:** Which topology is cheapest to install? **/2marks**

**Question19:** A company needs highest reliability in communication. Which topology is most suitable? Explain why **/5marks**

**Question20:** List 4 examples of End Devices **/5marks**

**Question21:** What type of cable is commonly used for wired Ethernet connections? **/4marks**

***Good Luck!!!***
