Window Server Administration

Virtual Machine

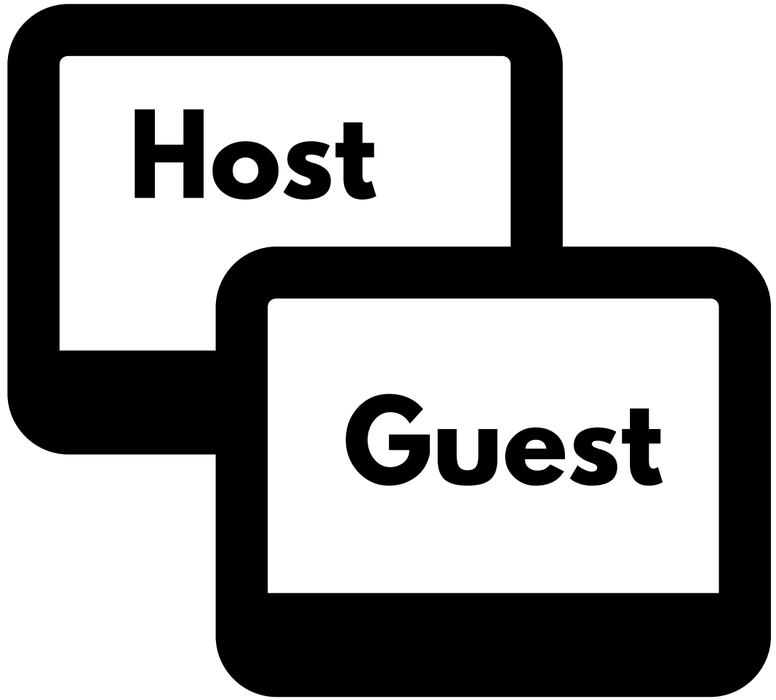

Giip Suku

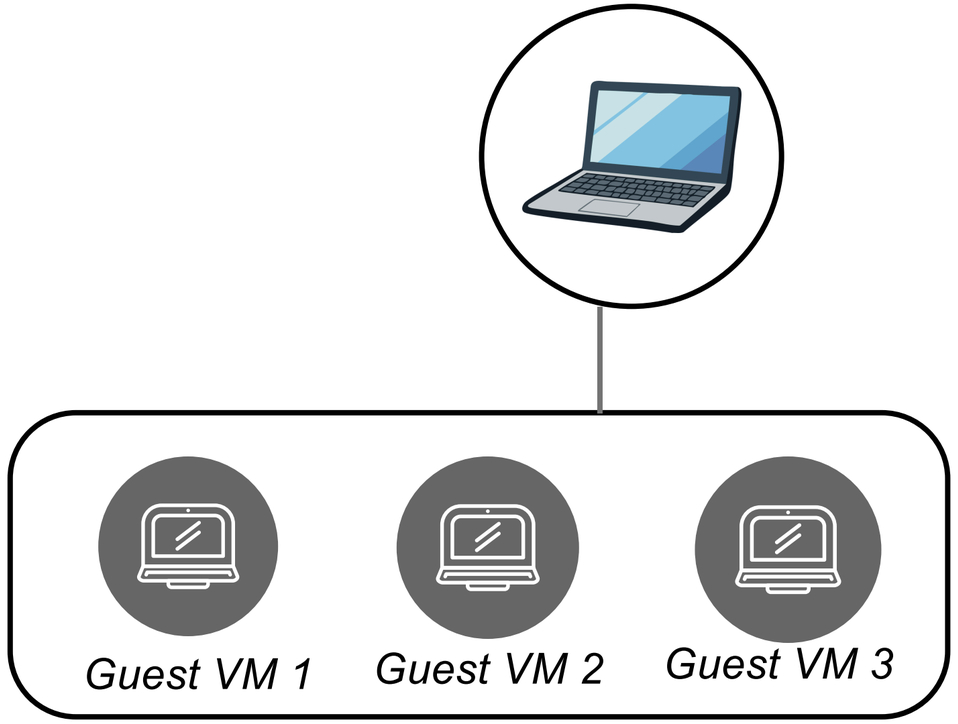

Virtual Machines

- **A Software Computer**
  - A Computer that operates with in another Computer.
  - Can be used just like any other computer.
- **Why use VMs (Virtual Machines)?**
  - VMs are stored on a physical Drive (HDD/SSD); thus extremely versatile.
  - VMs can be transfered from one computer to another like any other files on your computer.
  - VMs can be cloned and reconfigured very easily.

Host vs Guest

- A Host computer can host several Virtual Machines (VMs).
- A Guest VM Resides on a single Host computer.
- A Host Computer is generally a very powerful machine/Server designed to host (run) multiple Guest VMS.
